GEOFFREY EINAM KWAKU ADEVOR

SUMMARY

Aerospace Engineer and Aviation Leader combining Python, CAD, and heavy-maintenance expertise with a history of building autonomous VTOL drones from scratch. Passionate about collaborating with like-minded individuals to foster creative, high-trust environments. Driven to leverage rapid prototyping skills to build scalable AI startups and mentor upcoming African innovators

SKILLS & ABILITIES

- Troubleshooting and Instrumentation
- Basic Airframe Repairs (fairing, Aerodynamic surface, skin)
- Computer Aided Design (CAD) – Fusion 360, Solid works
- Python coding
- Gas and Electric arc welding
- Drone piloting (Quadcopter)

EXPERIENCES

AIRCRAFT MAINTENANCE TRAINEE, AEROJET AVIATION LIMITED

April 2023 – August 2025

- Performed insertion on aerodynamic surface and surface finishing on composite bonded surfaces.
- Removed and installed essential components on GE CF6 turbofan engine.
- Removed and aligned compressor fan blades on GE CF6 turbofan engine.

NATIONAL SERVICE PERSONNEL, GHANA AIR FORCE BASE (ACCRA)

December 2021- September 2022

- Performed both scheduled and unscheduled maintenance on MI 171 helicopter including troubleshooting of electrical hydraulic and avionics systems.
- Marshalled both fixed wing and rotary wing aircraft (Airbus C295, Z9 helicopter).
- Design and fabrication of new seat rails for MI 171 helicopter.

DATA VERIFICATION OFFICER, ACREATY GHANA LTD

June 2022 – August 2022

- Collected, corrected and analyzed NHIS claims in Ghana.
- Organized training for 10 -20 new employees.
- Detected and reported bugs in reconfirm software.

EDUCATION

KWAME NKRUMAH UNIVERSITY OF SCIENCE AND TECHNOLOGY – KUMASI – BACHELOR'S DEGREE – 2017 TO 2021

BSc Aerospace Engineering | 2ND CLASS UPPER (2:1)

- Built unmanned vertical takeoff and landing remote controlled aircraft.

- Design of various aircraft part using 3D CAD software for CFD analysis
- Completed courses such as Aerodynamics I, Aerodynamics II, Air vehicle design, Vibration I, Mechanical synthesis and analysis, Algebra I & II, Fluid Mechanics, CAD/CAM

SCHOOL OF TRADE TRAINING – BURMA CAMP – TRADE CERTIFICATE – 2018 TO 2020

- Gained strong foundation in avionics, electrical systems (power generation and distribution) and instrumentation; using digital multimeters/oscilloscopes.
- Developed practical skill in hydraulics, pneumatics and fluid power circuit using test rigs.
- Acquired hands-on experience in structural repairs, welding, soldering, precision measurements and safety/maintenance procedures.

ACHIEVEMENTS

- Built a flame detector circuit for detecting engine fires that exceeds the maximum allowable thresholds of engine (Vibration II , KNUST 2020)
- With the help of my group members, I built a VTOL Unmanned Aircraft to carry medical supplies up to a pay load of 3kg , KNUST 2021
- Recipient of Aerojet Aviation Scholarship (Merit) – April 2023
- BSc Aerospace Engineering Second class upper (2:1) , KNUST 2021

LEADERSHIP

- Led final-year project on unmanned VTOL remote controlled aircraft, KNUST 2021
- Caterpillar Technicians for the world (T4W) online certificate Jan 2026 – ongoing
- An active member of the Association of Aerospace Engineering student (AAES), Ghana
- An active member of Ghana Engineering Student Association (GESA), Ghana
- School President in junior high school 2013 – 2014
- Coursera Crash course on python – Apr 2022
